

Unleash the
Power of AI
in your business today

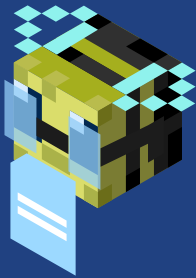

XponixAI empowers businesses, educational institutions and individuals with transformative AI technology. Our experienced team specialises in crafting custom AI solutions to meet unique requirements. Discover the future of innovation and transformation through our AI products and services.

AI Agents

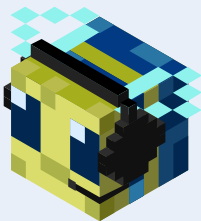

AI HR Assistant

Designed to support both employees and employers, this solution facilitates seamless access to HR services, automates routine inquiries, and provides personalised support.

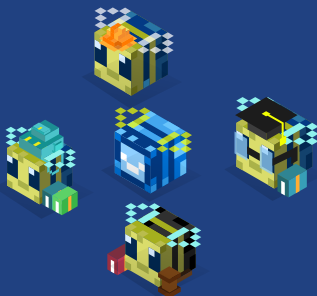

AI Employee Assistant

A digital companion for your workforce, offering instant access to information and tools within your organisation's knowledge base to boost productivity and knowledge sharing across your organisation.

AI Customer Support

Customer service with 24/7 support. Our AI agent understands and resolves queries efficiently, ensuring a superior customer experience.

Other Custom Agents

Tailored solutions designed to meet your specific business needs, enhancing operations through intelligent automation and insights.

✦ AI Educational Tools

AI Assessment Tool

Transform assessments with AI that grades accurately and provides instant feedback, enabling a more efficient learning process.

AI Tutor

Personalised learning experiences augment the teacher to support the students, available 24/7, adapting to their pace and style for improved understanding and retention.

AI Instructional Designer

Transform your existing documents, videos, audio, and web content into engaging educational materials. You can create learning materials such as learner resources, assessments, mapping documents and others based on units of competencies.

✦ Our Services

Custom AI-Powered Applications

Transform your vision into reality with bespoke AI innovative applications, streamline operations, and deliver exceptional value.

AI as a Service (AlaaS)

Unlock the potential of AI for your business with scalable, on-demand access to advanced AI technology, customised to meet your strategic objectives.

AI Consulting and Strategy

Involves providing expert advice and plans to organisations seeking to leverage (AI) to achieve their goals, optimise operations, and drive innovation.

Specialised AI Solutions

ExploraChat

An AI-driven multimedia interactive assistant that redefines content interaction. Capable of analysing and engaging with a variety of formats such as YouTube, MP4, MP3, DOC, PDF, PPT and websites. ExploraChat enables users to converse with the content, posing questions and receiving customised summaries and insights.

AI Immigration Agent

Simplify the complex visa and immigration process with our AI Immigration Agent. From navigating application requirements to offering personalised guidance, make your migration journey smoother and more understandable.
